

# **GREEN ACRES ICE CREAM**

## ***Peanut Allergy Statement***

**Ice cream stands typically contain many peanut sources, and cross-contamination can occur in various ways. However, our soft-serve custard is peanut-free and is self-enclosed within the machine, which offers the lowest risk of cross-contamination.**

**Please note that once the custard is dispensed into a cone or dish, adding any dips, sprinkles, or toppings will significantly increase the risk of exposure.**

**Regarding our hard ice cream, we are unable to open new tubs upon request. Our backup inventory is stored at temperatures well below what is required for scooping, and it takes considerable time to bring a new tub to the proper serving consistency.**

**All hard ice cream tubs at serving temperature can be stored in the same cabinets and do use the same scoops as flavors containing peanuts, posing a potential risk.**
